

2012 a&b Factsheet (drives and controllers)

a&b manages the development, modification and maintenance of machines, equipment and production lines, in which motion control, drives and controller technology are applied. The editorial team combines articles on application, business reports and interviews with regular features on drive technology, controller technology, motion control, industrial networks such as ethernet, industrial maintenance and production automation.

a&b targets users and developers of drive and controller components/systems and software, directors/owners, Heads of Technical Service, technical managers, Technical Service employees, machine and equipment builders, project leaders, buyers, sales engineers and maintenance technicians.

Circulation **6,400** copies in the Netherlands and Belgium.
